

## The new JLG Megadeck™ platform option

Introducing the JLG Megadeck™ platform option - the only serious option when getting to grips with cladding.

When you're over 7 metres up, trying to manhandle a sheet into position, you need a machine that's designed for the job. That's why it's important we listen to operators like you.

You asked for a longer deck - we delivered an impressive 7.62 metres (25 ft.).

You asked to get closer to your work - we delivered a platform that gets you within centimetres of the work area.

You asked for increased efficiency - we delivered a fast lift speed to get you to over 7 metres quicker.

So once again JLG has built a market leading machine that's designed to make your life easier and more profitable - and what's more it's all because we gave you what you asked for.
