

Atlas Copco forward and reversible plates
More compaction efficiency, longer lasting

Sustainable Productivity

FORWARD & REVERSIBLE PLATES

Atlas Copco offers a full range of forward and reversible plates in weight classes from 155 to 820 kg, featuring plate widths from 330 to 750 mm. Our reversible plates are specially designed to compact medium to deep layers

of granular soils in confined areas, such as trenches, parking lots and foundations. With a block paving kit they are also suitable for block paving applications.
